Texaco Tanker Comms Flow

vSFG7 SkyEye · Caucasus (Day / Night) · Command 282.000 → Texaco 1-1 252.100 AM · training test · SkyEye fb4473f, 19 Oct 2026

Texaco 1-1: KC-130, two wing drogues (hose and drogue, left and right) · **252.100 AM** (Hornet COMM 2 CH 8) · TACAN **51Y TX1** · orbit **angels 13, 250 KIAS**. Say your callsign, with its number, in every call.

1. Command (282.000): find the tanker (optional)

Pilot	Command
"Command, Raider 302, **request tanker**" (or "say Texaco", "nearest tanker")	"Raider 302, Command, Texaco 1-1 bears 045 for 32, angels 13. **Contact Texaco one one on two five two point one.**"

Bearings are magnetic from your jet. Calling "Bingo" to Command also gives you the nearest tanker.

2. Texaco 1-1 (252.100): check in to depart

Step	Pilot	Texaco
Check in	"Texaco 1-1, Raider 302, one Hornet, 15 miles, **intent to refuel**"	"Raider 302, Texaco one one, angels one three, two five zero knots, **how much do you request?**"
Give	"Raider 302, **request 5.0**" (or "five thousand pounds", "full", "top off")	"Raider 302, Texaco copies five thousand pounds." ("full": "Texaco copies, full give.")
Trail	"Raider 302, **one mile trail**"	"Raider 302, Texaco, form on my **left**." (second flight: my **right**)
In position	"Raider 302, **established**"	"Raider 302, Texaco, copy, you are **cleared port side, pre-contact**." (right drogue: starboard side)
In DCS	Comms menu: **Ready pre-contact**, then plug and take fuel	DCS handles the plug and the fuel transfer
Done	"Raider 302, **refuel complete**"	"Raider 302, Texaco, copy, **cleared to depart**. Good hunting."

Shortcut: check in and give in one call: "Texaco 1-1, Raider 302, intent to refuel, request 6.0" → "...angels one three, two five zero knots, copies six thousand pounds."

Angels come live from Tacview, so if Texaco moves, the number moves. Speed is always the planned 250 KIAS.

Words Texaco understands

Step	Any of these
Check in	intent to refuel · request fuel / gas · need fuel · checking in · inbound
Give	5.0 / five point oh · 5 thousand · 5000 pounds · full · top off · fill it up · max
Trail	one mile trail · in trail · astern
In position	established · in position · on your left / right · port / starboard wing · observation · pre-contact
Done	refuel complete · disconnecting · done · thanks · departing · clear of the tanker

Tips

Item	Detail
Order	Texaco only moves you on in order: check in, give, trail, in position. "Established" before a give is not answered; give your amount first.
Two flights	The first flight to call trail gets the left drogue; a second flight within 10 minutes gets the right.
No callsign heard	"Station calling Texaco one one, say again your callsign." Call again with your callsign.
Fuel won't flow?	SkyEye's clearance is radio only. DCS still needs your comms-menu **Ready pre-contact** before the drogue will pass fuel.
No answer?	Wait 3-4 s, then repeat once. Check 252.100 **AM**. Report callsign, frequency and time on Discord.
