Hitman JTAC Comms Flow

vSFG7 SkyEye · Caucasus (Day / Night) · Command 282.000 → Hitman 1-1 61.000 / 2-1 62.000 FM · SkyEye 8f20edf, 13 Nov 2026

Radios: Command 282.000 AM · **Hitman 1-1 61.000 FM** (Hornet COMM 2 CH 12, Viper COMM 2 CH 8) runs **targets 1, 2, 3, 4, 6** · **Hitman 2-1 62.000 FM** (no preset yet: dial it) runs **targets 5, 7, 8, 9** (nine sites, each a troops-in-contact force then its static target; V1.42 missions on). Set the radio to **FM** for both. Same calls on either net; replies below use Hitman one one.

1. Command (282.000): get handed to a Hitman

Pilot	Command
"Command, Raider 32, **request tasking**"	"Raider 32, Command, contact Hitman one one on 61.0 for tasking." (or Hitman two one on 62.0: whichever has a free target; come back for more and you get the other sector)
"**Copy**" / "wilco"	"Raider 32, Command, switch Hitman one one, good hunting."
"Command, Raider 32, **proceeding to Hotel**" (or "request Hotel") (kneeboard areas D, H, I are the 9-lines)	"Raider 32, Command, Hotel is nine-line target 4. Contact Hitman two one on 62.0 for tasking." That target is already drawn for you at check-in.

Command does not pick the target; Hitman does. With no targets: "negative tasking at this time."

2. Check in and get the 9-line (three blocks, only the grid is checked)

Pilot	Hitman
"Hitman one one, Raider 32, **checking in**" (or "ready for 9-line", "request tasking")	"Raider 32, Hitman one one, copy check-in. **Say ordnance and playtime.**" (first check-in only; no target yet)
"Raider 32, **four GBU-12s, thirty minutes**" (any weapon / count / time on station)	"Raider 32, Hitman one one, copy ordnance and playtime. **Target 2, <name>.** Line 1, IP <IP>. Line 2, heading <hdg>. Line 3, distance <nm> miles. **Read back.**" More than 5 nm from the IP, he adds: "<IP> bears 270 for 18."
Lines 1-3: "Hitman, Raider 32, IP <IP>, heading <hdg>, distance <nm>" (or just "copy")	"Readback correct. Line 4, elevation... Line 5, target... Line 6, location (two letters, then ten digits, read digit by digit). **Read back.**"
Lines 4-6: "Hitman, Raider 32, **location <two letters, ten digits>**" (the grid is the one line he checks)	"Readback correct. Line 7, mark... Line 8, friendlies... Line 9, egress, back to <IP>, <altitude>. **Read back.**"
Lines 7-9: "Hitman, Raider 32, copy" (or the friendlies / egress)	"Raider 32, Hitman one one, **confirmed.** Report IP inbound."

Only line 6, the location, is checked. The other lines need only a readback attempt or a "copy". Grid wrong: "negative, readback incorrect," and line 6 again. Wrong twice: he says it once more, "continue," and passes lines 7-9. **Missed it?** "Say again" repeats the block; "say again line 6" (or "say again location" / "say again grid") repeats the grid. If he cannot make out a call he says "say again your readback" and then repeats the block. Line 8 is corrected once if the distance is wrong. Hitman still checks the run from the Tacview picture.

Readback tip: don't say "Hitman" partway through your readback; a call like that is dropped as Hitman's own echo. Put Hitman first, or leave his name out.

3. The run

Pilot	Hitman checks	Hitman says
"Raider 32, **established IP Knife**"	At the IP (within 20 nm)	"Copy established Knife. Run in heading 297, final attack heading 270 to 330. Call in." (wrong IP: "negative, your IP is ...")
"Raider 32, **IP inbound**"	Within 20 nm of the IP, nose on the target	"Continue."
	Within 20 nm but off the run-in line	"Continue. Run in heading 297 from <IP>."
	Pointed more than 30° away from the target	"Continue. Check heading, target bears 090."
	More than 20 nm from the IP	"Negative, you are not at <IP>. <IP> bears 270 for 26. Report IP inbound from <IP>."
"Raider 32, **in from the west**" (or "in hot", "in heading 090", "rolling in")	0.5-15 nm from the target and inside the final attack heading window	"**Cleared hot.**"
	Outside the window, too far, or too close	"Abort, abort, abort. Outside final attack heading, 060 to 120. Re-attack from <IP>." (or "...you are 18 miles from the target..." / "...too close...")

After "cleared hot", Hitman watches for up to 4 minutes. If you swing outside the attack window (with 10° of slack) before a weapon comes off, he calls "abort, abort, abort" on his own. If Tacview can't see you, Hitman skips every check and clears you hot on your radio calls alone.

4. Off target and BDA

Pilot / when	Hitman
"Raider 32, **pickle**" / "**rifle**" after cleared hot	"Copy pickle, will report BDA."
"Raider 32, **off**"	"Copy off. Egress back to <IP>, <egress>. Report IP inbound for re-attack."
~15 s after your last impact **Good effects**	"BDA. Impact on the aim point. Good effects on target (or Good hits / Shack). Target destroyed, Raider 32. Thanks for the help. Egress angels 14, report ready for further tasking."
Partial effects	"BDA. 2 impacts, closest 30 metres north... Partial effects. Large tanks, 2 of 4 destroyed. Re-attack approved, report IP inbound from <IP>."
No effects	"BDA. Impact 300 metres north of the aim point. No effects observed. Re-attack, **correct south 300**. Report IP inbound from <IP>."
Unable to assess (the bridges)	"BDA. Impact on the aim point. Unable to assess, smoke and dust over the target. **Say your observed effects.**"
"Raider 32, **bridge dropped**" (or "good hits") "Raider 32, **no effects**"	"Copy, good effects. Thanks for the help. Report ready for further tasking." "Copy, no effects. Re-attack approved, report IP inbound from <IP>."
"**Request BDA**"	The BDA again. No attack yet: "negative BDA". Bombs flying: "standby for BDA". Hit another target: "impacted on target 9, not target 5."
"**Request direct attack**" / "**target destroyed**"	Same target again unless destroyed (his BDA, or your "target destroyed" call: "copy, ready for further tasking"), then a new one.
"Raider 32, **winchester**" / "**off station**"	"Copy winchester. Released from the net, thanks." (BDA due: standby, then the BDA)
"Raider 32, **abort**"	"Copy abort. Report IP inbound from <IP> for re-attack."

"Off" is answered once per pass. To re-attack, call "IP inbound" again. For a new target, "ready for further tasking" or "request tasking" to Hitman, or ask Command. The wording varies between passes; the meaning doesn't.

Radio check ("radio check", "comm check", "how copy"): "loud and clear". Each Hitman only knows his own sector's targets. **Callsign:** say it with its number ("Raider 3-0-2"). **No answer?** Wait 3-4 s, repeat once, check FM on 61.0 or 62.0, report callsign, frequency and time on Discord.
